

Registration and Storage of Human Tissue for the Purpose of Research
Compliance with the Human Tissue Act (2004)

2. Registration of Human Tissue at University of Bolton

For each sample acquired and stored at University premises, an entry must be made on the University register by way of completion of the appropriate information capture form. This is to be done by the PI of the research project. This form is available as an associated document to this Code. The information captured by the form will allow the HTA Compliance Officer (CO) to make an appropriate entry to the register of human tissue held at the University.

The Register will include details of:

- a) The project title,
- b) IRAS No or other REC No (if applicable),
